PACKCB6 **\$165.50**

→ When using backflow cones in a backflow burner, the smoke will flow down through the hole, and fall towards the ground for a beautiful visual display.

How to Light Incense Powder

Step 1

Place burner on appropriate surface. Pour ample amount of powder into center of burner.

1

Step 2

Using the powder leveler card, gently smooth the powder into the grooves of burner.

2

Step 3

Create a small powder mound at the starting point. Light the mound. Do Not Blow Out; flame will extinguish and powder will smolder.

3

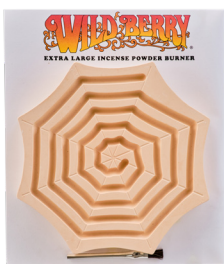

Incense Powder Kit

Wood Burners

→ Burners are the foundation it takes for your customers to keep coming back for more incense to burn. We have many of the classic designs always in stock (as seen here) and many more designs coming and going from our warehouse. Check the website for availability of other designs. We know how essential burners are to create repeat customers, this is why we include burners with every kit sold.

Smoking Bottles

→ It is truly captivating to watch the smoke swirl inside these bottles when in use. Smoking Bottles provide a safe, clean, and effective way to burn both Traditional and Shortie™ sticks. Just sandwich the wooden stick portion of incense through the attached ring that comes with every bottle. Let stick burn for a few seconds and blow out flame. Lower the stick into bottle until the ring sits on top. You will be mesmerized. The ash is collected in the bottom of the bottle for easy clean up.
